COMPLETE CONSTRUCTION SECURITY OFFERING

BELFAST

Envision-IS are at the forefront of utilising innovative security solutions to offer our customers the most up to date technological solutions which ensure the highest levels of security provision. With over 25 years' experience providing innovative security solutions across the UK, Ireland and Boston MA USA the team have a comprehensive range of products to fully secure the construction industry!

SERIES 1

Hardwired Security Systems

SERIES 2

Wireless Security Systems

SERIES 3

Eco Security Towers

SERIES 4

Remote Monitoring

SERIES 5

Construction Turnstiles

SERIES 1

- **Hardwired Security Systems**
- **CCTV, Intruder, Access Control**
- **Rental packages available for the duration of construction contracts**

Envision design, install and maintain CCTV, fire, intruder and access controlled hardwired systems. Either stand alone or integrated. Envision have partnerships with Global high end manufacturers, and can provide the latest and most effective technology to meet construction unique requirements.

SERIES 2

Envision Wireless Camera

- Envision wireless camera
- Full HD image
- Covert IR flash
- Long life span recharge
- Day and night camera
- Long range wide angle PIR
- Fully managed service which includes monitoring from Envision ARC 1
- Time-lapse

Wireless siren/beacon

The wireless siren is an audible and visual alarm indication device to announce an alarm condition within the monitored area.

The siren remotely operated by Envision ARC when confirmed intruder activation is received via the connected wireless camera system.

The beacon flashes on and off and is amber in colour. The battery is powered by 1.4 rechargeable lithium battery (Li-Ion)

The battery life has approximately 200 hours of alarm time.

SERIES 3

● Eco Security Tower

- Wireless camera Eco tower
- 24 month continuous power
- Steel structure, galvanized and powder coated
- 360° coverage (4 cameras and 1 siren)
- Free maintenance service
- Rapid deployment
- 3m mast height
- Beacon and siren

● Mega Eco Security Tower

- Wireless DRP camera options
- IP CCTV (PTZ, static, thermal, ANPR)
- ADPRO gateway NVR with intrusion trace
- 4G router (wifi repeater wifi position on site)
- 4 x 200w LED floorlights
- 8 x solar panels
- 16 x 200AH battery cells
- 5.4kw onboard silent generator
- External power outlet
- 9m mast height
- Twin axle trailer unit

SERIES 4

Remote Monitoring

- Envision ARC 1 (alarm receiving centre) accredited to BS EN 50518 standards
- Remote monitoring of CCTV, Intruder access, fire and lone worker systems
- High spec alarm monitoring package for full site protection
- Electronic incident handling reporting system
- Remote guarding operations for access and egress to site
- Help desk operations including guarding patrols and alarm response
- Registered with all UK and ROI police forces

SERIES 5

● Construction Turnstiles

- 2.4mtr x 1.8mtr steel turnstile pod
- Thermal and facial access reader for entrance
- Facial access reader terminal for office induction
- 2.8mm lens camera with Nvr
- Software
- Web portal

- 6mtr x 2.4mtr steel security office with access turnstile pod attached
- Thermal and facial access reader for entrance
- Facial access reader terminal for office induction
- 2.8mm lens camera with Nvr
- Software
- Web portal

ENVISION TIME-LAPSE

Capturing the essence of a construction project to showcase for your company marketing and PR.

The time-lapse camera is a wireless battery operated standalone system which also integrates with our wireless detection system. The Envision time-lapse camera will capture a collection of thousands of HD still images to capture the ongoing progress of any construction site.

The images will be stored on our secure server and can be downloaded easily and quickly at any time throughout the project. Our team will then create the time-lapse video and tailor it to your company needs.

THE COMPLETE SECURITY SOLUTION

Envision offer complete security solutions to safe guard your premises and protect your assets.

The complete range of security solutions we offer are:

- Hardwired CCTV
- Wireless cameras
- Wireless Eco towers
- Security fencing and hoarding fencing
- Concrete Bollards
- Mobile lighting towers
- Temporary fire alarm
- Temporary intruder alarm
- Solar and electric gates
- Alarm response and key holding
- Canines/guarding patrols
- Turnstiles with facial, temperature, fingerprint, palm recognition and card reader
- Lone worker app
- After hours monitoring from Envision ARC 1 BS EN 50518
- Envision time-lapse system
